

# Traction on the slippery slope

The gradual onset of dementia puts residents on a slide from no-risk to a high-risk of wandering.

A patient wandering system can help to manage that risk and provide peace of mind for caregivers and families alike.

From single doors to large scale systems, tek systems group inc. has the expertise required to recommend and implement a solution for your facility.

#### System features include:

- Simple system protection for doors, halls, and elevators.
- Tag battery is activated/ deactivated with unique battery on/off function (saves money).
- LED provides visual indication that tag is working.
- Full 1 year warranty and free technical phone support.
- System has adjustable volume control for alarms/alerts.
- Can integrate with door alarms, nurse call or phone/paging systems.

Tek systems group inc. uses Accutech, the best provider of institutional monitoring technology; for more information on the products available, please see the enclosed Accutech brochure.
